High Style Meets Functional Innovation in Berwick Bathroom Sink Faucets from American Standard

*WaterSense Faucets Achieve High Efficiency Performance;
Features Include Easy-to-Install Speed Connect Drain and TRIMendous
Universal Valve Technology*

LAS VEGAS, HD EXPO (May 15, 2013) — Inspired by the ribbon mills on the banks of the scenic Susquehanna River, the [Berwick collection](#) from American Standard marries fluid design with refined precision. Its dramatic, ribbon-like water flow, reminiscent of streaming satin, captivates the senses, refreshing and revitalizing everything within its reach.

Distinguished by its sleek linear design, the Berwick collection extends across the bath with a full collection of faucets designed to provide a coordinated look and feel throughout the space. Like all American Standard bathroom faucets, all Berwick bathroom sink models have a 1.5 gallons per minute (gpm) flow rate, and incorporate pressure-compensating aerators that provide 32 percent water savings over standard models. They are WaterSense-certified by the U.S. Environmental Protection Agency (EPA), ensuring water savings without sacrificing performance.

A ribbon-like water flow defines the Berwick bathroom sink faucet collection from American Standard. This widespread model features an innovative swivel spout that rotates left to right, facilitating access to the sink basin.

- more -

The [widespread model](#) has an innovative swivel spout that rotates from left to right smoothly and effortlessly, enabling easy rinsing of hard-to-reach areas and facilitating access to the sink basin.

Engineered for fast and easy installation, the Berwick collection of bathroom faucets incorporates the exclusive pre-assembled Speed Connect drain with only four parts, instead of the 14 different parts used with conventional drains. This innovative system simplifies drain installation and never needs adjusting. The drain seals tightly so

The American Standard Berwick bathroom faucet sink collection includes matching shower system trim featuring exclusive TRIMendous universal valve technology, making it easy to upgrade in-wall valves.

water stays in the sink, and the lift rod comes set to correct height and never works loose.

Design-matched tub fillers, bath/showers and shower-system trim complete the assortment. Berwick bath/shower trim leverages the American Standard TRIMendous universal valve technology, making it easy to upgrade any existing American Standard bath/shower in-wall valve, eliminating the need to rip out tile.

The bath/shower also features a beautiful contemporary 6-inch brass rain showerhead that provides a drenching and relaxing shower experience. Rounding out the collection is a full line of shower system trim that will turn any bathroom into a personalized luxury spa.

Accessories from the Serin collection — towel bars and rings, robe hooks and toilet tissue holders — provide a final complement, lending a unified, finished look to the entire room.

Like all American Standard bathroom faucets, Berwick fixtures are worry-free, drip-free and built to last. Each faucet is equipped with washerless ceramic disc valves for a lifetime of reliable, water-saving performance. Available finishes include polished chrome and satin nickel. The line is covered by a limited lifetime warranty.
