FOR IMMEDIATE RELEASE

The AT200 SpaLet from DXV by American Standard Combines Contemporary Design with the Latest Automated Technology

Customizable Water-Cleansing Functions Ensure the Ultimate in Personal Hygiene and Comfort; Bidet Seat Also Available

LAS VEGAS, HD EXPO (May 13, 2015) — Sleek and sophisticated, the AT200 SpaLet and the AT100 bidet seat from DXV by American Standard are luxury fixtures that combine peerless design, advanced technology and flawless engineering to bring a fresh new standard of personal comfort and cleansing to the modern bathroom.

Elegant in form, lavish in features, and unmatched in water efficiency and performance, these superb products are an indispensable addition to today's environmentally aware lifestyle. Created in the belief that fully customizable control is the key to personalized comfort and well-being, the AT200 and AT100 offer a range of completely automated, easily adjusted functions to transform the bathroom into a relaxing, life-enhancing space — without compromising effectiveness, proficiency or healthfulness.

Establishing a new benchmark in personalized cleansing and comfort, the AT200 SpaLet from DXV by American Standard offers an unrivalled range of sophisticated features to enhance the modern bathroom environment, while delivering the ultimate in performance and efficiency.

- more -

The experience begins when the user approaches the AT200 SpaLet and the seat lid opens smoothly and automatically — a graceful hands-free operation that's as effortless as it is hygienic. All cleansing functions are enabled by a sensor as soon as the user sits down on the seat, which has adjustable heating for additional comfort. When the user departs, the lid closes and the toilet automatically flushes, too. The AT200 incorporates a soft night light in the bowl and in the area around the feet, conveniently illuminating the base of the toilet and the inside of the bowl.

The AT100 bidet seat from DXV by American Standard brings the luxury and salutary benefits of the stand-alone bidet to the standard toilet by using the familiar refreshing action of water as a soothing and hygienic personal cleansing system.

With their beautifully considered aesthetics and state-of-the-art technology, the AT200 and the AT100 use the soothing action of warm water as a refreshing and hygienic alternative to toilet tissue, offering the ultimate in fully automated personalized comfort and convenience for all members of the family.

Both feature two separate nozzles for natural and convenient front and rear cleansing. Nozzle positions (including oscillating options), spray volume and strength, and water temperature are all adjustable by easy-to-use remote control, allowing for a completely individualized cleansing experience. There is also a massage feature and an efficient built-in warm-air drier for use after washing.

The AT200 SpaLet and the AT100 bidet seat from DXV by American Standard are available through an exclusive network of American Standard showrooms and dealers across North America. For more information, visit www.dxv.com or call (800) 227-2734.
