FOR IMMEDIATE RELEASE

Compact and Sustainable, High-End Decorum Pint Urinal and Lavatory Launched by American Standard

Contemporary Styled Bathroom Fixtures Accommodate the Demanding Performance and Design Standards of Upscale Commercial Settings

The Decorum pint urinal from American Standard showcases modern styling while operating with only 0.125 gallons of water per flush (gpf). This ADA-compliant model also complies with stringent California water conservation regulations.

PISCATAWAY, N.J. (March 1, 2016) — American Standard has introduced a pint urinal and wall-hung sink to its commercial Decorum fixture collection. Both the urinal and sink offer a sleek, modern and compact design that can be coordinated to create an inviting commercial suite reflecting sophisticated styling and functionality.

In addition to its aesthetically-pleasing design, this new pint urinal showcases environmentally-sustainable qualities. Meeting the 2016 California water restriction regulations, the Decorum pint urinal features a newly updated hydraulic system that functions on only 0.125 gallons of water per flush (gpf). It uses 87 percent less water than a standard 1.0 gpf urinal, while still meeting optimum flushing performance standards.

- more -

Ideal for the most demanding commercial settings, this compact pint urinal is ADA-compliant for universal accessibility. Keeping user comfort in mind, this urinal is designed with a generously deep bowl that helps reduce splashing. It is available in either top or back spud configurations.

The complementary Decorum wall-hung sink, with its 20-inch width and 18-inch depth, was designed for compact spaces that demand luxurious style to accommodate client expectations. It features a recessed self-draining deck for minimal backsplash when in use and is both ADA and TAS-compliant.

Providing various design options for architects and interior designers, this white lavatory is available in multiple configurations: with 4-inch or 8-inch centers or center hole only, without any faucet holes, with or without a rear overflow, plus there are various optional soap dispenser configurations available. Specifiers can design upscale, modern commercial space by coordinating the Decorum wall-hung sink with the stunning American Standard Serin faucet collection of deck-mount or wall-mount faucets.

The Decorum wall-hung sink is ADA and TAS-compliant and is designed with a self-draining deck for minimal backsplash. It is available with or without a rear overflow, providing flexibility for facility managers.

Both the Decorum pint urinal and wall-hung sink feature the Company's exclusive EverClean surface, the permanent antimicrobial finish that inhibits the growth of stain and odor-causing bacteria, helping these fixtures stay cleaner, longer.

The Decorum pint urinal and wall-hung lavatory boast the full package to meet the needs of facility managers in upscale settings: compact artistic design, water-efficiency and minimal maintenance, making this collection ideal for luxury commercial spaces.

The new Decorum wall-hung sink and pint urinal from American Standard are combined here with the Afall Millennium toilet and angular Serin faucet to create a commercial suite reflecting contemporary inspiration. Fixtures and faucets are controlled using the Company's exclusive Selectronic hands-free sensor technology.
