FOR IMMEDIATE RELEASE

## Ultra-High-Efficiency Toilets from American Standard Save Water and Money

*Water-Conserving, High Performance H2Option Dual Flush  
and H2Optimum Models Are MaP PREMIUM Eligible*

LAS VEGAS, HD EXPO (May 4, 2016) —Two ultra-high-efficiency toilets (UHETs) from American Standard offer significant water savings and powerful performance, earning MaP PREMIUM certification for flushing at least 600 grams of solid waste using an average 1.1 gallons of water per flush (gpf). This qualifies these UHETs for the most generous [toilet replacement rebates](#) available in the country.

These UHETs offer a choice of a dual flush [0.92/1.28 gpf H2Option tank](#) or [single flush 1.1 gpf H2Optimum](#) style. They represent the first gravity-flush toilets from American Standard that are MaP PREMIUM-certified via the Maximum Performance (MaP) test, an independent report of toilet performance.

The American Standard H2Option dual flush ultra-high-efficiency toilet (UHET) offers impressive water and cost savings while being eligible for MaP PREMIUM rebates, which is particularly attractive for residents of drought-stricken areas.

- more -

Both toilets feature approachable, transitional styling and are available in a choice of three bowl configurations: elongated, round front, or a taller Right Height (16 1/2-inch) elongated bowl. To complete a full bathroom ensemble, the casual design lines of the American Standard [Tropic bathroom sinks](#), combined with the fluid rhythm of the [Tropic bath and shower faucet collection](#), are the ideal accompaniment to these UHETs.

“The H2Option and H2Optimum offer the highest water efficiency in our residential toilet line. As [MaP PREMIUM models](#), they save nearly 20 percent more water than current stringent WaterSense requirements demand,” said James Walsh, vice president of product marketing, LIXIL Water Technology Americas, American Standard. “That means

significant water and cost savings for homeowners doing simple toilet replacement or major remodeling.”

This first-rate operation is driven by the exclusive American Standard PowerWash siphon-jet bowl cleaning technology. It provides a quiet, yet powerful, flush that scrubs the bowl with pressurized water from the rim during every flush to remove every trace of paper and waste through a fully-glazed, two-inch trapway.

For easy cleaning, these toilet models incorporate [EverClean, the antimicrobial finish](#) that inhibits the growth of stain and odor-causing bacteria, mold and mildew on the surface, helping the toilet stay cleaner, longer. This exclusive feature from American Standard is included at no additional cost.

Delivering high performance, as well as impressive water savings, the H2Option ultra-high-efficiency toilet (UHET) is eligible for MaP PREMIUM rebates to help homeowners save money while conserving resources.

These UHETs have earned WaterSense-certification from the U.S. Environmental Protection Agency (EPA)

for providing high performance and water efficiency. Additionally, these MaP PREMIUM-listed toilets save nearly 20 percent more water than the current WaterSense requirement.

The single flush H2Optimum is available in white, while the dual flush H2Option is available in a choice of three colors, white, bone and linen, as well as an optional lined tank version. Both models are 12-inch rough-in configurations.

These American Standard UHETs are protected by a limited lifetime warranty on chinaware and a limited five-year warranty on all mechanical parts of the toilet. The toilet seats, which are purchased separately, have a limited one-year warranty.

The H2Option and H2Optimum white toilet models, plus the optional bone and linen colors and lined tank models, are available at kitchen and bath showrooms and wholesalers nationwide. Prices range as follows, depending on model: H2Option \$351 to \$626; H2Optimum \$216 to \$324.
