Congratulations on purchasing your American Standard faucet with the Speed Connect Drain, a feature found only on American Standard faucets.

Speed Connect Drain*
- 1/3 of the parts, installs in 1/3 of the time
- No tools needed
- Never needs adjustment
- Guaranteed to seal properly the first time, every time.

*Your new American Standard faucet is designed to work only with the Speed Connect Drain. Helpful tips for removing your current drain can be found in the Troubleshooting section of these instructions.

To ensure that your installation proceeds smoothly-please read these instructions carefully before you begin.

Recommended tools
- Adjustable Wrench
- Screwdriver
- Channel Locks
- Plumbers' Putty or Caulking
- Tubing Cutter
- Tubing Cutter
- Tubing Cutter

1) INSTALL FAUCET

- Apply a bead of putty along the edge of the underside of the FAUCET (1).
- Insert FAUCET (1) and CABLE CONNECTOR (2) through center hole of mounting surface. Fig. A.
- From under side of mounting surface thread the two MOUNTING NUTS (3) onto FAUCET SHANKS (4). Fig. B.
- Center FAUCET (1) and hand tighten MOUNTING NUTS (3) to secure FAUCET (1).
2 INSTALL POP-UP DRAIN

- Remove CLEAR PLASTIC COVER (1). Remove CARDBOARD SPACER (2) from under DRAIN POP-UP (3). Fig. A.
- Drop DRAIN BODY (4) through sink drain hole. Make sure WHITE FOAM GASKET (5) is under flange of DRAIN BODY (4). Fig. B.
  
  **Note:** No plumber’s putty or caulk is required.
  
  The CABLE ATTACHMENT POINT (6) must face towards the rear of the SINK. Fig. B.

3 INSTALL BLACK GASKET

- Install BLACK CONE GASKET (1) onto DRAIN BODY (2) from below.
  
  **Note:** The flat side of the BLACK CONE GASKET (1) must face down.

4 INSTALL GRAY LOCKNUT

- Install GRAY LOCKNUT (1) onto DRAIN BODY (2) from below SINK. Fig. A.
  
  **Note:** The flat side of the GRAY LOCKNUT (1) must face up.
  
  Tighten firmly by hand. No tools are required. Check DRAIN FLANGE in SINK to ensure that WHITE FOAM GASKET (3) is fully compressed and not visible. Fig. B.

5 POP-UP KNOB

- POP-UP KNOB (1) must be fully down.
6 ATTACH CABLE CONNECTOR

- Thread CABLE CONNECTOR (1) clockwise onto DRAIN BODY CONNECTION (2) and hand tighten. Fig. A.

Your new POP-UP DRAIN installation is now complete. Fig. B.

Note: Tailpiece on pop-up drain is 1-1/4" O.D. Fig. B.

7 CHECK OPERATION OF POP-UP

- Operate LIFT KNOB (1) to verify that STOPPER (2) opens and closes.

Note: If STOPPER (2) does not open and close properly then refer to the “troubleshooting section” of these instructions.

8 MAKE WATER SUPPLY AND WASTE CONNECTIONS

NOTE: FLEXIBLE SUPPLIES OR BULL-NOSE RISERS NOT INCLUDED AND MUST BE PURCHASED SEPARATELY.

- Connect water supply to INLET SHANKS (1) with 1/2" IPS FLEXIBLE SUPPLIES (2) or 3/8" O.D. BULL-NOSE RISERS (3). Use adjustable wrench to tighten connections. Do not overtighten. Be careful not to kink copper supply when bending. Use tubing cutter to cut to proper length.

- Connect HOT water supply to inlet of left SHANK and COLD water supply to right SHANK using sealant, appropriate connectors, and COUPLING NUTS.

- Connect 1-1/4" O.D. TAILPIECE (4) on POP-UP DRAIN to “p” trap.
9 TEST INSTALLED FITTING

- With HANDLES (1) in OFF position, turn on WATER SUPPLIES (2) and check all connections for leaks.
- Ensure that AERATOR (3) is tightened completely.
- Operate HANDLES (1) to allow water flow.

10 CHECK DRAIN CONNECTIONS

- Operate POP-UP KNOB (5) and fill Sink with water. Check that DRAIN STOPPER (4) makes a good seal and retains water in Sink. If STOPPER (4) does not seal properly, please refer to “Troubleshooting Guide” in these instructions.
- Release POP-UP KNOB (5) down and check all drain connections and "P" trap for leaks. Tighten if necessary.

11 SERVICE

If Faucet Drips Proceed As Follows:
- Turn VALVE in OFF position.
- If spout drips, operate HANDLES (1) several times from OFF to ON position. Do not force-handles they turn only 90°.

To change direction of handle rotation, proceed as follows:
For Products purchased before May 2008
- Turn VALVE to OFF position.
- Loosen SET SCREW (2) and pull HANDLE (1) off. Remove ADAPTER SCREW (4) and pull ADAPTER (3) off VALVE STEM (5).
- Turn ADAPTER (3) 90° so that flat within ADAPTER (3) catches a different flat on the VALVE STEM (5).
- Replace ADAPTER (3), ADAPTER SCREW (4) and HANDLE (1). Tighten SET SCREW (2).

For Products purchased after May 2008
- Turn VALVE STEM (3) 90° so that flat on VALVE STEM (3) faces away from the SPOUT (4). (Water may turn on)
- Replace HANDLE (1) and tighten SET SCREW (2).

12 CARE INSTRUCTIONS:

DO: SIMPLY RinSE THE PRODUCT CLEAN With CLEAR WATER. DRY With A SOFT COTTON FLANNEL CLOTH.

DO NOT: DO NOT CLEAN THE PRODUCT With SOAPs, ACID, POLISH, ABRAsIVES, HARsh CLEANERS, OR A CLOTH With A COARSE SURFACE.
Speed Connect™ Drain Troubleshooting Guide

If sink does not hold water even though Stopper is in the “down” position:
• Follow CABLE ADJUSTMENT PROCEDURE.

If Stopper does not raise up fully or sink drains too slowly:
• Follow CABLE ADJUSTMENT PROCEDURE.

If you need to remove the Stopper:
• Follow STOPPER REMOVAL PROCEDURE.

If you would like the ability to remove your Stopper simply by lifting it out of the drain:
• Follow STOPPER INSTALLATION PROCEDURE for “Unlocked” mode.

CABLE ADJUSTMENT PROCEDURE

- Disconnect the Cable from the Drain by threading the Cable Connector (1) counter-clockwise. Fig. A.
- Look at the area on the Drain Body where the Cable was attached and locate the component labeled as “Cam” in the illustration. Fig. B.
- Use a small screwdriver to rotate the Cam in the clockwise direction as far as it will go. At this point the Stopper should be in the UP position. Fig. B, C.
- Push DOWN on the Lift-Knob to make sure it is fully down. Fig. C.
- Re-attach the Cable to the Drain Body Connection (2) by threading the Cable Connector (1) clockwise onto the Drain Body Connection (2) and hand-tighten. Fig. A.

STOPPER REMOVAL PROCEDURE

- Disconnect the Cable from the Drain by threading the Cable Connector (1) counter-clockwise. Fig. A.
- Look at the area on the Drain Body where the Cable was attached and locate the component labeled as “Cam” and “Cam Cap” in the illustration. Fig. B.
- Use fingers or small screwdriver under either side of the Cam Cap to pry it out from the Drain. Fig. D.
- Remove the Cam by pulling it straight out while wiggling gently to loosen the Rubber Seal. Fig. E.
- The Stopper can now be removed by lifting it out of the Drain. Fig. F.
STOPPER INSTALLATION PROCEDURE

The Stopper can be installed two ways, “Locked” Mode (Stopper cannot be removed) or “Unlock” Mode (Stopper is removable).

Locked Mode:
- Look at the Plastic Loop at the bottom of the Stopper and notice that the Loop is on one side of the Stopper. Fig. G.
- To install the stopper in “Locked” mode, insert the Stopper into the Drain so that the Plastic Loop is facing toward the rear of the Sink and the American Standard logo is facing front. Rotate Stopper slightly if necessary so that the Stopper slides all the way down. Fig. G.
- Re-install the Cam into the Drain, rotating the Cam if necessary to make sure it is fully inserted. Fig. J.
- Re-install the Cam Cap, making sure the guide teeth are facing outward. If the Cam Cap does not “snap” into place, then rotate the Cam to make sure it is fully inserted. Fig. K.
- Re-attach Cable. See “CABLE ADJUSTMENT PROCEDURE” in Troubleshooting Guide to complete installation. Stopper will be in “Locked” mode and not be removable.

Unlocked Mode:
- Look at the Plastic Loop at the bottom of the Stopper and notice that the Loop is on one side of the Stopper. Fig. H.
- To install the stopper in “Unlocked” mode, insert the Stopper into the Drain so that the Plastic Loop is facing toward the front of the Sink and the American Standard logo is facing rear. Rotate Stopper slightly if necessary so that the Stopper slides all the way down. Fig. H.
- Re-install the Cam into the Drain, rotating the Cam if necessary to make sure it is fully inserted. Fig. J.
- Re-install the Cam Cap, making sure the guide teeth are facing outward. If the Cam Cap does not “snap” into place, then rotate the Cam to make sure it is fully inserted. Fig. K.
- Re-attach Cable. See “CABLE ADJUSTMENT PROCEDURE” in Troubleshooting Guide to complete installation. Stopper will be in “Unlocked” mode and removable.
TIPS FOR REMOVING YOUR OLD DRAIN:

Most existing drains can be removed quickly and easily with only a pair of channel-lock pliers or a wrench. However, there may be situations where it is difficult to remove your old drain or determine how the drain is disassembled. Depending upon the existing Drain in your sink, it is either removed from above or below the sink. The illustrations below show some typical drain installations and how they are disassembled from the sink.

The following tips can help with some of the more common challenges in drain removal:

- Loosen nuts on P-Trap using channel locks. Suggest spraying nuts with spray lubricant to loosen any corrosion or debris that may have built up. Remove P-Trap half from Tailpiece. Use bucket to catch any residual water in P-trap.
- Unthread Pivot Rod Nut from Drain Body and remove. Pull Stopper out from Drain Body.

For Drains that are removed from below Sink:
- Loosen Mounting Nut as far down as it will go. Push Drain Body up into Sink and unthread Flange from Drain Body. Remove Drain Body from below sink.

For Drains that are removed from above Sink:
- Unthread Tailpiece from Drain Body.

- Loosen and remove Mounting Nut and Gasket on Drain Body using channel locks. Suggest spraying nut with spray lubricant to loosen any corrosion or debris that may have built up. Push Drain Body up into the Sink and remove.

Note: If Drain body rotates while loosening Mounting Nut, insert a screw driver into overflow hole to prevent Drain Body from rotating while Mounting Nut is removed.

Required tools

- Channel Locks
- Adjustable Wrench
- Phillips Screwdriver

WHEN DRAIN IS REMOVED FROM BELOW SINK

**METAL OR PLASTIC TWO PIECE DRAIN BODY**

- **STOPPER**
- **UNTREAD FLANGE**
- **SINK**
- **MOUNTING NUT**
- **PIVOT ROD NUT**
- **FINISHED WALL**
- **P-TRAP HALF**

WHEN DRAIN IS REMOVED FROM ABOVE SINK

**METAL DRAIN BODY WITH PLASTIC TAILPIECE**

- **SCREWDRIVER**
- **STOPPER**
- **MOUNTING NUT and GASKET**
- **PIVOT ROD NUT**
- **PLASTIC TAILPIECE**
- **FINISHED WALL**
- **P-TRAP HALF**

**PLASTIC DRAIN BODY WITH PLASTIC TAILPIECE**

- **STOPPER**
- **PIVOT ROD NUT**
- **MOUNTING NUT and GASKET**
- **PLASTIC TAILPIECE**
- **FINISHED WALL**
- **P-TRAP HALF**
