THANK YOU...

for selecting an American Standard bath. Your new bath is shipped to you after careful inspection. The air bath is completely assembled with air blower and system piping. All you need to finish the installation are your selected fittings and electrical connections.

To ensure maximum performance and pleasure from this product, please follow the instructions and cautions.

FOR AFTER-SALES SERVICE CALL 1 (800) 442-1902 WEEKDAYS.

IMPORTANT SAFETY INSTRUCTIONS

INSTRUCTIONS PERTAINING TO A RISK OF FIRE, ELECTRIC SHOCK OR INJURY TO PERSONS

READ AND FOLLOW ALL INSTRUCTIONS!

⚠️ WARNING: Risk of personal injury. Do not permit children to use this unit without adult supervision.

⚠️ WARNING: Risk of personal injury. Do not operate this unit without the guard over the suction fitting.

⚠️ WARNING: Risk of electric shock. Do not permit electrical appliances (hair dryer, telephone, radio, etc.) within 60 inches (1524mm) of this unit.

⚠️ WARNING: Risk of hyperthermia and possible drowning. People using medications and/or having adverse medical history should consult a physician before using this product.

⚠️ WARNING: Risk of personal injury. Do not overfill unit before entering. Entering tub when filled more than 2/3 can cause overflow and slippery conditions. Exercise caution when entering and exiting.

⚠️ WARNING: No Food or Alcoholic Beverages. Use of your bathtub immediately after meals is not recommended. Avoid alcohol consumption before or during bathing. Alcoholic beverages can cause drowsiness or hyperthermia resulting in loss of consciousness or even drowning.

⚠️ WARNING: Pregnancy. If you are or think you may be pregnant, consult your physician before using the bathtub.

Never drop or insert any object into any opening.

Use this unit only for its intended use as described in this manual. Do not use any attachments not recommended by American Standard.

The unit must be connected only to a supply circuit that is properly protected by a ground-fault circuit-interrupter (GFCI). Such a GFCI should be provided by the installer and should be tested on a routine basis. To test the GFCI, push the test button. The GFCI should interrupt power. Push the reset button. Power should be restored. If the GFCI fails to operate in this manner, the GFCI is defective. If the GFCI interrupts power to the bathtub without the test button being pushed, a ground current is flowing, indicating the possibility of an electric shock. Do not use this air bath. Disconnect the air bath and have the problem corrected by a licensed electrician before using.

SAVE THESE INSTRUCTIONS
General Installation Information

Carefully uncrate and inspect your new bath for any shipping damage. If such damage is found, report it to your vendor immediately. After inspection and during installation, protect the bath from construction damage. **Before installation, and before enclosing with wallboard, tile, etc., the bath must be filled with water and operated to check for leaks that may have resulted from shipping damage or mishandling!** Do not make unauthorized modifications to the air bath system. This could adversely affect the safety and performance of the air bath and void the warranty. Do not handle or move the air bath by the air blower or piping system. Fittings (bath filler, shower arm, etc.) are not provided with the bath and must be ordered separately. Framing and enclosing materials are provided by others.

For electrical requirements, refer to section titled “Air Bath Electrical Installation Instructions”.

Check for availability of optional American Standard wall tiling bead (required for recess installation). Protect all finished surfaces of the air bath during construction and installation using a drop cloth.

⚠️ **WARNING:** Do not lift air bath by the piping harness at any time.

TABLE 1
DIMENSIONS OF FIXTURES ARE NOMINAL AND MAY VARY WITHIN THE RANGE OF TOLERANCES ESTABLISHED BY ANSI STANDARDS Z124.1 AND A112.19.7.
INSTALLATION AND FRAMING INSTRUCTIONS

The variety of installations possible for this air bath may require framing procedures other than those shown. Locate studs as needed. Ensure roughing-in dimensions are proper, plumb and square. Provisions must be made in all installations for an access opening for servicing the air blower and controls. It is strongly recommended that an additional opening be provided for access to the drain components. The apron should not be used as the primary access opening.

1. Position the air bath into the installation opening and level the deck in both directions, shimming the integral support feet IF necessary. Mark the final position of the underside of the deck by tracing a line on to the studs (see Figure 1).

2. Remove the air bath and attach a 1 x 4 stringer to the studs, with the top of the stringer touching the traced line.

   The rim of the bath must not support weight.

3. Install drain components to the air bath following the drain installation instructions. Before replacing your air bath for final installation, be certain that an opening has been provided in the sub-floor for the drain. See the roughing-in drawing and Table 1 for suggested opening size (shadowed) and location dimensions. The drain/overflow of the bath extends below the bottom of the bath. Note that this requires a cutout in the floor.

   The floor structure beneath the bath must be able to support a total weight of bath, water, and bather. Refer to Table 1 under total weight for your model.

For Models: 2425L / V.168C-RHO and 2425L / V.268C-LHO;
This bath must be supported along its entire bottom. Use mortar as bedding material (do not use sand or foam). Apply enough mortar to support the complete bottom of the bath. After the mortar has been poured, and before it sets, position bath within recess until the rim is leveled against the leveling stringers (see "Typical Recess Installation") shown below.

   The rim of the bath must not support weight. Allow the mortar material to completely harden before applying weight to the rim or bottom of the bath. Any finish material such as tile or wall board must be self-supporting if it contacts the deck of the bath.

For Models: 2645L / V.068C, 2771L / V.068C, 7236L / V.068C and 2422L / V.068C;
Replace air bath and re-shim the integral support feet, shimming the entire length of the support feet. Secure the shims using construction adhesive, silicone, mortar or equivalent materials. While not a necessity, the use of a foundation base consisting of cement, mortar, or grout will help provide a solid and secure installation.

   The rim of the bath must not support weight. If foundation base is used, allow the bedding material to completely harden before applying weight to the rim or bottom of the bath. Any finish material such as tile or wall board must be self-supporting if it contacts the deck of the bath.
SUGGESTED AIR BATH / BATH INSTALLATION METHOD

SECURE THE BATH TO THE STUDS AS SHOWN FOR WOOD OR STEEL STUD CONSTRUCTION.

UNDER DECK MOUNTING INSTRUCTIONS

Please note that care must be taken to protect the surface of the tub during all aspects of the installation. Do not drill or cut the bath deck with the tub directly beneath it as damage to the tub may result.

1. Install the tub per the installation instructions provided with the unit.
2. Prepare the bath deck support structure per the local codes. Note - the bath deck must be self supporting.
3. Cut bath deck to your specifications.
4. Place the bath deck in position and trace the opening on the tub with a soft pencil. Do not drill or cut the bath deck with the tub directly beneath it as damage to the tub may result.
5. Remove the bath deck and apply a generous bead of waterproof sealant on the outer edge of the traced line.
6. Replace the bath deck and secure it into place.
7. Apply additional sealant along the tub and bath deck interface as necessary to ensure a watertight seal.
8. Remove excess sealant per the manufacturer’s instructions.

Finished bath deck surface material must be self-supporting and secured per local codes.
AIR BATH ELECTRICAL INSTALLATION INSTRUCTIONS

All wiring must be performed by a licensed electrician in accordance with the national electrical code and all other applicable codes.

WARNING: When using electrical products, basic precautions should always be observed, including the following:

1. DANGER: RISK OF ELECTRIC SHOCK! Connect only to a circuit protected by a ground-fault circuit interrupter.

2. Permit access for servicing blower as noted.

3. All building materials and wiring should be routed away from the air blower.

PLEASE SEE THE FOLLOWING TABLE FOR GFCI CIRCUIT REQUIREMENTS:

<table>
<thead>
<tr>
<th>GFCI CIRCUIT REQUIREMENTS:</th>
<th>FOR MODEL NUMBERS:</th>
</tr>
</thead>
<tbody>
<tr>
<td>The air bath should be installed on a 120 vac, 15 or 20 amp dedicated GFCI circuit.</td>
<td>2425L / V.168C-RHO 2422L / V.068C</td>
</tr>
<tr>
<td>The circuit should be hard-wired from the electrical power supply panel. The circuit must be a three (3) wire circuit from the electrical supply panel. A grounded neutral wire and a third wire, earth ground, are essential.</td>
<td>2425L / V.268C-LHO 2645L / V.068C</td>

ELECTRONIC ACTIVATED AIR BATH (4 BUTTON PANEL)
REMOTE BLOWER LOCATION OPTION

IMPORTANT! It is not necessary that the blower motor be relocated. This option is provided for the case that a particular installation makes this effort practical.

NOTE: Relocating blower motor from factory installed location, see photo 1, will require disassembly of air blower from mounting board. Keep all hardware for reattachment at new location. Additional hardware will be required depending upon final desired position of air blower. Follow all instructions listed below.

1. TYPICAL VIEW

NOTE: Installing the blower in a remote location will reduce the system efficiency.

NOTE: Relocating a blower motor still requires a service access for the blower.

NOTE: All materials needed for the relocation must be supplied by the installer. This includes ordering a longer control panel cable (754025-0073A), a longer flexible blower hose (753960-2030A), and up to two lighting cable extensions for combo models (754512-0070A).

A separate circuit, which must be protected by the Ground Fault Circuit Interrupter (GFCI), is required in the remote location. Electrical connections should be performed by a licensed electrician.

The blower motor must be located within 12 feet of rigid piping from the bath air manifold. This limitation is for the total pipe length and applies to any direction changes and elbows. There can be no more than six changes of direction. There should be as few direction changes as possible and the piping installation must meet all requirements of local plumbing and building codes.

Disconnect the blower from the flexible hose as shown in photo 2. Do NOT remove the check valve manifold that is mounted to the underside of the air bath. The manifold MUST remain mounted above the tub overflow level as shown in 2.

2. TYPICAL VIEW  

Replace the flexible hose shown in photo 2 with the longer flexible hose (P/N 753960-2030A) using the existing hope clamps.

NOTE: Do NOT remove the original cable coming out of the blower. Instead, plug the longer cable (P/N 754025-0073A) into the existing cable that is coming out of the blower as shown in photo 3. Then plug the remaining end of the longer cable into the control panel which remains on the tub wall.

3. TO CONTROL PANEL  

754025-0073A CABLE  
(INCLUDES ADAPTER BOX SHOWN)  

TO BLOWER  

EXISTING CABLE
POST INSTALLATION CLEAN-UP

Remove all construction debris from bath. Tile grout can be removed with a wooden popsicle stick or tongue depressor. Do not use wire brushes or any other metal implement on bath surface.

Post installation clean-up generally can be completed using warm water and liquid dishwashing detergent. Stubborn dirt or stains may be removed using granular Spic and Span® mixed with water.

Painter's naphtha can be used to remove excess adhesives and/or wet oil-base paint.

AFTERCARE and CLEANING

• The high gloss surface is resistant to impact and chemicals and will retain its lasting luster with proper care and maintenance.

• Always fill the tub with temperate water. Excessively hot water may cause surface damage dry in the tub may cause surface damage.

• Clean after use with a mild liquid household detergent cleaner. Do not use Lestoil, Lysol Disinfectant (spray or concentrate), or Lysol Basin, Tub and Tile Cleaner, Windex, Mr. Clean, Dow Disinfectant Bathroom Cleaner, or cleaning products in aerosol cans.

HARSH CHEMICALS SHOULD NEVER BE USED ON ACRYLIC SURFACES.

• Do not use wire brushes, knives or sharp objects to remove stains, cigarette tar deposits, or other surface blemishes.

• Abrasive cleaners or powders must not be used, since they will dull the surface. If the glossy surface loses its sheen, dulled areas can be restored by rubbing with a white "automotive type" polishing compound and waxing with a "liquid wax."

• Do not wax areas where you walk or stand.

• Do not allow nail polish remover, acetone, dry cleaning fluid, paint remover or other solvents to come into contact with the surface.

• Clean the surrounding surface immediately after using caustic drain cleaners.

• Burning cigarettes will damage the surface.

• Should damage to the fixture occur, repairs can be made quickly and easily. Your distributor or builder can provide details.

• Do not permit drain cleaner to enter the circulation system.
Operation: Air Bath

BATHING:
• Close drain by rotating Drain Overflow Knob COUNTER-CLOCKWISE
• Fill bath with water at a comfortable bathing temperature, adding bath oils or salts as desired.

OPERATING AIR MASSAGE SYSTEM:

EXITING THE BATH
• Be sure to turn off the air blower before draining bath.
• Open drain by rotating drain knob clockwise.

DRYING CYCLE OPTIONS

STANDARD DRYING CYCLE
An automatic drying cycle will start 20 minutes after the blower is turned off. The blower LED blinks while waiting for the purge cycle.

24H PROGRAMMABLE DRYING CYCLE
The system must be stopped prior to activation or deactivation.

Activation: Determine at which time you wish to purge to activate. At that precise time, press and hold the second button on the keypad for 5 seconds, all LEDs will flash twice. The purge cycle will now start at the programmed time every 24 hrs. In the event of a power failure, the program will be automatically deactivated.

Deactivation: Press and hold the second button on the keypad for 5 seconds, all LEDs will flash once to confirm deactivation.
Your American Standard whirlpool is designed to give you many years of pleasure with reasonable care and maintenance.

Your new acrylic bathtub is tough, durable and easy to care for. The colors have been formulated to match other American Standard fixtures and enhance your choice of bathroom decorations. The high gloss surface will retain its lasting luster with proper care and maintenance.

CLEANING AND MAINTENANCE:
• Always fill the tub with temperate water. Excessively hot water (greater than 130˚ F) may cause surface damage.
• Remove bath mat after use and hang to dry. Allowing bath mat to dry in the tub may cause surface damage.
• Clean after use with a mild liquid household detergent cleaner. Do not turn on jets when such cleaners are present.

Do not use: Lestoil® Cleaner; Lysol® Disinfectant (spray or concentrate); or Lysol® Basin, Tub and Tile Cleaner; Windex® Cleaner; Mr. Clean® Cleaner; Dow® Disinfectant Bathroom Cleaner*; or other cleaning products in aerosol cans.

HARSH CHEMICALS, SHARP AND ABRASIVE OBJECTS SHOULD NEVER BE USED ON ACRYLIC SURFACES
• Do not use wire brushes, knives or sharp objects to remove stains or other surface blemishes.
• Use of abrasive cleaners or powders will dull the surface. If the glossy surface looses its sheen, dulled areas can be partially restored by rubbing with a white automotive body polishing compound and waxing with a liquid wax. Do not wax surfaces where you walk or stand.
• Do not allow nail polish remover, acetone, dry-cleaning fluid, paint remover, or other solvents to come into contact with the surface.
• Clean the surrounding surface immediately after using caustic drain cleaners. Do not permit drain cleaner to enter circulation system.
• Burning cigarettes will irreparably damage the surface of the whirlpool.

CLEANING/PURGING THE CIRCULATION SYSTEM
Once every month the circulating system must be purged and cleaned. Follow the steps outlined below:
1. Fill whirlpool with warm water and add two teaspoons of powdered automatic dishwasher (not laundry) detergent and one-half cup of household bleach to filled whirlpool.
2. Activate whirlpool system in accordance with operating instructions and run system for two minutes.
3. Drain and refill whirlpool with cold water. Circulate for five minutes.
4. Drain whirlpool completely after step 3 (above) is completed.

AS America, Inc. Limited Lifetime Warranty For Lifetime™/Evolution™ Acrylic Air Baths

AS America, Inc. ("American Standard") warrants to the original consumer purchaser that it will, at its option, repair or replace this air bath or any of its parts that are found by American Standard, in its sole judgment, to be defective under normal residential use and maintenance so long as it is owned by the original consumer purchaser.

This warranty shall only become effective upon receipt by American Standard of a completely filled out Warranty Registration Card evidencing proof of purchase.

This limited warranty does not apply to commercial installations. The warranty for commercial installations is three (3) years.

THIS WARRANTY SHALL BE VOID IF THE ACCESS PANEL TO THE AIR BATH IS COVERED IN ANY MANNER CONTRARY TO THE INSTALLATION INSTRUCTIONS. In no event will American Standard be liable for the cost of repair or replacement of any installation materials including but not limited to tiles, marble etc.

This limited warranty DOES NOT COVER the following:

1. Defects or damages arising from shipping, installation, alterations, accidents, abuse, misuse, lack of proper maintenance and cleaning as directed in the owner’s manual and use of other than genuine American Standard replacement parts, in all cases whether caused by a plumbing contractor, service company, the owner or any other person.
2. Deterioration through normal wear and tear and the expense of normal maintenance.
3. Commercial application.
4. Options and accessories. American Standard's limited warranty on these items is one year for parts only and excludes labor. This one year limited warranty covers accessories manufactured by American Standard (e.g. aprons, drains, grab bars, heaters, trim kits) against defects of material or workmanship. Warranty coverage begins on the date the accessory was originally purchased by the owner.
5. Postage or shipping costs for returning products for repairs or replacement under this limited warranty and labor or other costs incurred in connection with product removal or installation under this limited warranty.
6. ANY LIABILITY FOR CONSEQUENTIAL OR INCIDENTAL DAMAGES, ALL OF WHICH ARE HEREBY EXPRESSLY DISCLAIMED, OR THE EXTENSION BEYOND THE DURATION OF THIS LIMITED WARRANTY OF ANY IMPLIED WARRANTIES, INCLUDING THOSE OF MERCHANTABILITY OR FITNESS FOR AN INTENDED PURPOSE. (Some jurisdictions do not allow limitations on how long an implied warranty lasts, or the exclusion or limitation of incidental or consequential damages, so these limitations and exclusions may not apply to you.)
7. Responsibility for compliance with local code requirements. (Since local code requirements vary greatly distributors, retailers, dealers, installation contractors and users of plumbing products should determine whether there are any code restrictions on the installation or use of a specific product.)

This warranty gives you specific legal rights. You may have other legal rights that vary from state to state. For service under this warranty, you should contact the following:
