### GENERAL DESCRIPTION:

Below deck thermostatic water mixing valve to be used with Selectronic™ & Metering faucets. Adjustable temperature by using a 4mm Hex Wrench. To decrease temperature, rotate clockwise. To increase temperature, rotate counter-clockwise.

### PRODUCT FEATURES:

- Recommended for point of use temperature mixing for Selectronic™ and Metering Faucets.
- Anti-scall protection.
- Built-in check valves prevent cross-flow.
- 20" long S.S. Flex hoses with 3/8" compression connections.
- Modular design attaches directly to Selectronic™ faucet control box.
- NSF 61/Section 9

### RECOMMENDED SPECIFICATION

The Mixing Valve shall be of thermostatic type with built-in check valves to prevent cross-flow. Includes 20" long S.S. flex hoses with 3/8" compression fittings. Fitting shall be American Standard Model # 605XTMV.
