

MODEL NUMBER:

4902330.XXX Pull-Down Filter Kitchen Faucet

GENERAL DESCRIPTION:

The Saybrook Filtration faucet features a built-in filtration system that is activated with a simple press a button, a filter life indicator light, and easy to replace filter at your counter top.

How it Works

The filter captures impurities such as lead, chlorine, and debris particles through a 3-stage filtration process. With a simple press of a button you get filtered water immediately. Unlike competition, the Saybrook Filtration faucet never mixes with unfiltered water and there's no waiting time for crisp, great tasting water. To simplify the experience even further, the filter can be installed on your countertop in one of the sink holes next to the faucet, so changing the filter is always right at your fingertips. When it comes time to replace the filter, the Saybrook faucet has you covered. Equipped with IntelliSense the system will indicate when the filter is low (half white ring), very low (red ring), when it's time to replace the filter (blinks red), and even when it's time to swap out the AA batteries (illuminates orange). It's truly that simple!

PRODUCT FEATURES:

- Quick and easy filter replacement from countertop
- **Nothin' but H2O:** Removes Chlorine, Lead, Particles, and Improves Taste & Odor
- **Instant Cold Filtered Water With a Press of a Button**
- **Truly Filtered From the Start:** Separate cold waterway means immediate filtered H2O that never mixes with unfiltered water
